

MilfordMD Cosmetic Dermatology Surgery & Laser Center Adds HydraFacial MD to Its Armamentarium of Nonsurgical Facial Rejuvenating Options

Share Article

MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford, Penn., has added a new technology, the HydraFacial MD, to make facial skin look and feel youthful and vibrant. HydraFacial MD not only rids facial skin of dead skin cells and toxins, but also replenishes and nourishes skin health with antioxidants, hyaluronic acid, growth factors and peptides.

MILFORD, PA (PRWEB) MAY 11, 2016

MilfordMD Cosmetic Dermatology Surgery & Laser Center, in Milford, Penn., has added a new technology, the **HydraFacial MD**, to make facial skin look and feel youthful and vibrant. "Skin health is a big issue for most of our patients. They want to take special care of their facial skin so it doesn't lose its glow and youthful elasticity. The noninvasive HydraFacial MD device allows us to deliver supervised medical strength office-based treatments that not only address fine lines, wrinkles and sun damage, but also improve the skin's elasticity, firmness, skin tone and texture," says Dr. Richard Buckley, a cosmetic surgeon and medical director of MilfordMD.

HydraFacial MD treatments can be done in as little as 30 minute and are enjoyable. "This is a facial rejuvenating option that we can offer to patients with all skin types—from light to dark," Dr. Buckley says. "And there's no irritation or downtime, so people can go back to their work lives, social lives and activities right after treatment."

Dr. Buckley says that he recommends patients have monthly

HydraFacial MD is the latest advance in non-invasive, non-laser skin resurfacing and rejuvenation. It improves wrinkles, acne and other skin irregularities and is now available at MilfordMD!

“The noninvasive HydraFacial MD

HydraFacial MD treatments to maintain healthy, vibrant skin. But most, he says, will notice their facial skin looks better after one treatment. HydraFacial MD treatment works by ridding the face of dead skin cells and skin's surface of other impurities, while nourishing the skin's clean, new surface with hydration, antioxidants and more.

"This is not your ordinary facial," Dr. Buckley says. "The HydraFacial MD device uses a Vortex-Fusion serum delivery system, which prepares the skin to receive replenishing super serums, including antioxidants, peptides and hyaluronic acid. The device's patented CTGF Vortex-Booster delivers high levels of naturally occurring growth factors into the skin. It's all the things the skin needs to stay young looking, but loses with age and environmental toxin exposure."

Antioxidants help to protect the skin and boost cell function by fighting free radicals. Peptides are amino acid links that improve collagen and elastin production. Hyaluronic acid, which the body naturally produces, gives skin its fullness and volume. It's what cosmetic surgeons, like Dr. Buckley, have used for years as a **filler to plump wrinkles** and lines, as well as build facial volume. And growth factors are the very proteins charged with regulating healthy cellular function for youth skin structure and function.

"The HydraFacial MD is a great option by itself for patients who simply want to keep their skin looking the best it can, regardless of age," Dr. Buckley says. "We also use it to enhance results of other treatments, chemical peels and laser treatments aimed at offering patients more dramatic skin rejuvenation but with some recovery or downtime." For example, patients can add **Fotofacial**, which uses intense pulsed light, or IPL, to diminish sun damage, fine lines, large pores and other signs of skin aging.

Mild skin resurfacing with the HydraFacial MD is more than a quick fix, according to Dr. Buckley. It works over time to keep skin healthy.
